Description

CFM Whey Protein Isolate is the purest protein source we have ever offered. This top of the range protein is produced through the patented CFM process (Cross micro filtration). This process is very gentle since it uses neither heat nor chemicals. The end product is a protein isolate with a purity of over 90% and a biological value of 146.

CFM Whey Protein Isolate also contains only very small amounts of Carbohydrates, Fat and Lactose. It is usually well tolerated by people with a lactose intolerance. CFM Whey Protein Isolate also contains the protein fractions Beta-Lactoglobulin, Alpha-Lactalbumin, Bovine Serum Albumin and Immunoglobuline which can support the immune system.

CFM Whey Protein is fully instantized and dissolves easily.
